# THE SURVEY

Survey 10 people on the following questions:

- 1) Are you aware of the causes of climate change? How many causes can you name?
- 2) Are you personally active in recycling? If so, what types? (Newspapers, aluminum cans, plastic, etc.).
- 3) What additional things are you willing to do to slow climate change?

## Part 1

Responses

## Part 2

	Number (#) replying yes	Total Number Surveyed	Percentage (%) # ÷ total number you surveyed = Z Z x 100 = %
Those aware of what climate change is?			
Those actively recycling?			
Those willing to do more to curb climate change?			

# The Process

1. Write a short description of the video you watched on the 'introduction' page (view again if you like). Describe what you are seeing and what consequences there might be for the future?

2. Summarize the findings from all three steps on the 'Quest' page. Include your questions and the answers you received.

## EVALUATION

### Reflection

Using your 'Quest' and 'Survey' as source material, on a separate sheet of paper, in at least two (2) paragraphs, write a reflection describing what human activities cause climate change and how we can curb its affects on the planet in the future while also answering the five questions found on the 'Process' page of your WebQuest. Be sure to staple to this worksheet.
